## Batman Versus Superman

Who's the greatest? There has always been lots of discussion about who is the best superhero!

Some would argue that Superman is a true superhero, because he was born with amazing powers. On the other hand, Batman had to work hard, learn how to fight and fear is his weapon! He learnt how to fight when his loving parents were murdered, because he wanted to seek justice against evil criminals.

One reason people think Batman is powerful is that he is highly intelligent. He can solve the most difficult puzzles or hack into protected computers with ease. Superman, on the other hand, can barely solve simple puzzles. Batman uses his intelligence to beat brilliant masterminds, but Superman relies on his physical powers.

Sometimes heroes are judged by their amazing costumes. Batman's costume is very different to Superman's. Many people say it's so much cooler! He has a tight, grey body suit that has a stylish, black bat emblazoned on it. He also has an amazing utility belt full of powerful gadgets and a mask to hide his face. Superman's brightly coloured costume is nowhere near as cool, but some say at least he doesn't look like a flying rat!

It is a very difficult choice with lots of arguments on both sides. If I had to choose who should be superhero of the century, I would choose Superman. After all, he can fight crimes at any time of day!
